At Zorlu Enerji, as a requirement of our social responsibility in order to create a more habitable world, we continue to work on an environmental management system based on the development of environmental awareness and protection of natural resources. For us, the environment is an important trust that we will pass on to future generations.

In this respect, in all our activities;

- We choose materials and technologies to minimize adverse environmental impacts,
- We ensure the most efficient use of energy and natural resources,
- We develop systems to prevent pollution at its source before it occurs,
- We control our waste (solid, liquid, gas) and dispose of it in a way that does not harm the environment,
- We strictly comply with our environmental and international legal regulations and compliance obligations,
- We work with the aim of protecting the environment and nature by evaluating the safety of the work in all conditions at the maximum level of safety of our colleagues and our company by evaluating first and foremost,
- We assess our environmental and social impacts in our activities and implement our impact reduction measures within our management plans,
- We train our employees, suppliers and subcontractors to increase environmental awareness,
- In our new investments, we conduct environmental impact analyses, use technologies to minimize environmental impacts and implement our environmental management plans meticulously,
- We aim to continuously improve our environmental performance,
- We monitor, manage and report greenhouse gas emissions transparently to mitigate the effects of global climate change,
- We share our sustainability performance with our stakeholders in a transparent manner according to the GRI (Global Reporting Initiative) methodologies, a global reporting initiative,
- As a signatory of the United Nations Global Compact, we regularly and transparently share our performance in this field with our stakeholders.

İbrahim Sinan AK
