NOTES ON THE FY 2025 ASSESSMENT CYCLE

In FY 2025, the scope of the ESG assessment programme was expanded to 32 critical and strategic suppliers, selected on the basis of contract value, business criticality and sector-specific ESG risk exposure.

One supplier (Metal Oto Ticaret) was excluded from the assessment scope following its declaration of concordato (bankruptcy protection); the assessment was therefore completed for 31 suppliers.

Individual ESG performance scorecards were issued to all assessed suppliers, together with training content addressing the improvement areas and risks identified during the assessment.

For FY 2026, Zorlu Enerji aims to further expand the assessment scope to include a greater number of critical suppliers in line with contract size and strategic importance.

To support meaningful interpretation of the results, the scorecards included a sectoral benchmarking component, positioning each supplier's ESG performance relative to the average performance of its own sector. This comparative perspective allows suppliers to identify their relative strengths and lagging areas, and provides a clear reference point for setting improvement targets in the following assessment cycle.
